Environmental policy

AB Germa aims to demonstrate its commitment to the environment by pursuing an active environmental program to reduce and prevent negative environmental impact.

This means that we must:

Make environmental work a natural part of the business.

Define the objectives and targets.

Give priority to renewable resources, recycling and low energy consumption.

Preventing pollution by sorting and participate in organized waste disposal.

Require our suppliers of products and services that they operate environmentally aware.

In all respects comply with applicable environmental laws and other user-defined requirements and customer requirements.

Prioritize employee training in basic environmental knowledge and how our operations and products affect the environment.

Inform customers how environmentally to deal with our products after use period. How the products should be disposed of with environmental concerns.

Kristianstad, 2010-03-31

Managing Director
