

## dentaComfort Vacuum Pillow

The DentaComfort pillow is used by dentists for the positioning of patients in the dental chair. It has a range of benefits and features for both dentists and patients. The DentaComfort pillow gives comfort and support. It helps patients relax and makes the dentists job easier.

For greater comfort and secure positioning  
The DentaComfort pillow by GermaProtec, provides a comfortable neck and headrest for dental patients, and a secure working environment for dentists.

The dentaComfort Pillow forms a firm support for most parts of the body uniformly, with weight evenly distributed, reducing the risk of pressure points. Can be used to accommodate structural deformities and is also appropriate for temporary posture correction.

The Vacuum Pillows consist of an strong airtight shell containing larger quantity of granules made of polystyrene.

DentaComfort pillows are designed and manufactured by GermaProtec in Sweden, for use during dental treatment and surgery. DentaComfort pillows have been designed and developed in cooperation with dentists and offer a range of benefits for both dentist and patient. The positive feedback we have received from our customers around the world indicates that our customers are very satisfied with our pillows.
