

EasyFix Vacuum Splints

Easy Fix Vacuum splints are intended and designed to deliver premium stabilisation to injured patients during transport. They are suited for fixation of patients with hand, wrist, arm, leg, shoulder and/or hip injuries. The splint moulds around the individual fracture and gives an absolute optimal and very comfortable support to the patient. Designed and constructed to reduce needed preparation and is very reliable and a product you can trust, world class equipment.

Product information

- Full Leg splints with extra Velcro for strap allowing the splint to be used as vacuum mattress for babies and children.
- Full leg splint is provided with additional Velcro straps to ensure that one size fits all.
- Velcro is sewn onto a piece of PVC coated fabric to reinforce the strength of the Velcro straps
